The Problem Building the 21st Century Percussionist

- Percussion education has grown by leaps and bounds in the past twenty years. Depending solely on your band or orchestra method book to develop your percussionist will only take them so far and in most cases leave them lacking in many areas.
- These method books often do not properly develop skills needed for young percussionist or only touch a skill set and then quickly move on.
- To continue your students' development, your percussionists need to acquire specific skill sets outside of your method book.

Developing Middle School Percussionists

This clinic will focus on the development of skill sets needed by middle school percussionists, including the following:

- Legato stroke
- Piston stroke
- Down stroke
- Up stroke
- Double stroke
- Natural sticking
- Alternate sticking
- Scales
- Rudiments

Selecting Your Percussionists

- Basic stroke
- Ability to maintain a steady tempo
- Rhythmic aptitude
- Pitch aptitude

The Grip

- The fulcrum
- Thumb and first finger on the fulcrum
- Fingers gently wrap around the stick/mallet, but remain in contact with the stick
- No space between fingers or the stick

The Stance

- Drum/Keyboard waist height
- 6-12 inches away from the instrument
- Beads together in the center of head/bar
- 90 degree angle

Legato Stroke

- Legato - in a smooth flowing manner, without breaks between notes
- This stroke should have a full range of motion, starting from the wrist. The fingers should remain in contact with the stick at all times. This is the most basic and one of the most utilized strokes percussionists use.

Starting the Legato Stroke

- RRRRRRRRLLLLLLLL
- RRRLLLLLRRRRLLLL
- RLLRLLRLL
- RLRLRLRLRLRL
- RLRRLLRLRLRLRL
- These and many other sticking patterns can be found in "Stick Control" by George L. Stone.
- These sticking patterns can be developed and used in middle school, as well as throughout high school.

Continuing the Legato Stroke

Legato Strokes

Snare Drum

The notation shows two staves of music in 4/4 time. The top staff contains two measures of eighth notes, each with a 'R' (Right) below it. The bottom staff contains two measures of eighth notes, each with an 'L' (Left) below it. The notes are connected by a horizontal line, indicating a legato stroke.

Legatos with 16th Notes

Legato Stroke adding 16th notes

Snare Drum

The notation shows two staves of music in 4/4 time. The top staff contains two measures of 16th notes, each with an 'R' (Right) below it. The bottom staff contains two measures of 16th notes, each with an 'L' (Left) below it. The notes are connected by a horizontal line, indicating a legato stroke. The bottom staff also includes a 'Sim.' (Sustain) note.

The Piston Stroke

The piston stroke is utilized on keyboard instruments and is similar to the legato stroke. The piston stroke starts at the top and returns to the top, which creates efficient movement across the keyboard and allows for a fluid stroke.

The Piston Stroke

The Piston Stroke

The notation shows two staves of music in 4/4 time. The top staff contains two measures of eighth notes, each with a 'C' (Clef) below it. The bottom staff contains two measures of eighth notes, each with a 'C' (Clef) below it. The notes are connected by a horizontal line, indicating a legato stroke.

Basic Timing Elements

- Once students begin to understand the concept of legato and piston strokes, apply those ideas to basic timing exercises.
- These exercises will help percussionists develop a stronger rhythmic vocabulary.
- In addition, they will help students understand natural and alternate stickings.

8th Note Timing

8th Note Timing

The notation shows two parts: Snare Drum and Keyboard. The Snare Drum part is in 4/4 time and consists of four measures of eighth notes with the following stickings: R L R L R L R L, R L R R L R, R L R L R L R L, and R L L R L L. The Keyboard part is in 4/4 time and consists of four measures of eighth notes with the following stickings: R L R L R L R L, R L R R L R, R L R L R L R L, and R L L R L L.

Combining 16th and 8th Notes Alabama Texas

Alabama Texas

The notation shows two parts for the Alabama Texas exercise in 4/4 time. The first part has a square box above the first measure and consists of two measures of 16th notes with stickings: R L R L R L R L R L R L R L R L and R L R L R L R L R L R L R L R L. The second part has a square box above the first measure and consists of two measures of 16th notes with stickings: R L R L R L R L R L R L R L R L and R L R L R L R L R L R L R L R L.

Natural Sticking and Alternate Sticking

- Natural sticking is based on hands playing on a specific beat, which allows the rhythm patterns to be played with the same sticking throughout a given passage.
- Alternate sticking simply alternates hands through a specific rhythmic passage while moving back and forth from right to left hand.

Countdown

Countdown

Musical notation for the Countdown exercise, consisting of four staves of rhythmic patterns. The first staff is in 8/8 time, the second in 6/8, the third in 3/8, and the fourth in 2/4. Each staff shows a sequence of notes with stems and beams, representing a descending sequence of rhythmic values.

4-2-1 Sequence with 16th and Triplet Groupings

16th Note Accent Pattern

Musical notation for the 16th Note Accent Pattern exercise. It consists of two staves. The first staff is in 4/4 time and shows a sequence of 16th notes with accents, with fingerings R L R L R L R L R L R L R L R L R L. The second staff is in 6/8 time and shows a similar sequence of 16th notes with accents and fingerings R L R L R L R L R L R L R L R L R L.

Triplet Accent Pattern

Musical notation for the Triplet Accent Pattern exercise. It consists of one staff in 6/8 time, showing a sequence of triplet groups of 16th notes with accents and fingerings R L R L R L R L R L R L R L R L R L.

Double Stroke

- The double stroke is used to create rolls and drags. This stroke is similar to the legato in its range of motion and rebound. It differs in that the player must use the back two fingers, ring finger and pinky, as well as the wrist, to get the second note to sound.
- A good double stroke will come from one motion and create two even notes.

Double Strokes Using Alabama Texas

Alabama Texas

Musical notation for the Alabama Texas exercise, consisting of two staves. The first staff is in 4/4 time and shows a sequence of double strokes with fingerings R L R R L L R L R R L L R L R L R R L L R R L L R. The second staff is in 6/8 time and shows a similar sequence of double strokes with fingerings R R L L R L R R L L R L R R L L R R L L R L R L R.

Drag Rudiments

Drag Rudiments

Single Drag

Single Ratamacue

Applying Skills Sets in the Classroom

- Daily warm-up
- Technique development
- Sectionals

Thank You to the Following

- Jeff Atkins, Kim Bain, Dr. Mark Foster, Mike Holmes, Heather Holmes, Brandon Peters, and Mark Sosnowchik, Jereff Horton, Heather Palmer, Sara Womack
- Clayton Thorne, Joseph Pwitt, Austin Blain, Zack Downing, Joseph Wendel, Zach Zedekni, Margo King, Trey Hodges, Todd Gwainey, Rhett Randolph, Austin McNamee, Josh Littlefield, Sam Pruitt, Alaina Barham, Patric Taylor, Logan Risner, Demarcus Kelly
- The all the students from Pritz, Oak Mountain, Mountain Brook, and Hewitt-Trussville Middle Schools
- Neal Flum, Beth Gottlieb, and the University of Alabama School of Music
- Innovative Percussion Sticks and Mallets
- Pearl Drums
- Adams Musical Instruments
- Evans Drumheads
- Alabama Music Educators Association
- Garry Taylor
